## Academy

### Politeknik Negeri Batam

Batam

Associate Degree in Computer  
Science/IT

2021

## Skills

## Experience

### Digital Transformation Officer

#### PT. Panji Jaya

*December 2023 - December 2025*

Play a role in developing web-based applications to support the company's digital transformation. Build systems that automate work processes, connect various internal systems, and present critical data to support decision-making. Involved in full-stack application development, system integration, data management, and production process automation to improve operational efficiency and accuracy.

### Software Developer

#### PT. Graha Kreasi Solusindo

*February 2022 - September 2023*

Served as a team member responsible for maintaining the established banking system and integrating reporting features. Additionally, developed healthcare applications.

### Fullstack Web Developer

#### CV. Dana Mitra Sukses

*Juli 2021 - December 2022*

Developed a CodeIgniter 3 based admin portal that enables comprehensive management of company assets, farming activities and operational workflows.

### Junior Software Engineer

#### PT. Menara Kaca Indonesia

*April 2020 - April 2021*

*Building and developing web-based applications in a startup environment with the aim of creating a social media website platform.*

### **Programmer Internship**

Schneider Electric Manufacturing Batam

*April 2019 - November 2019*

As an intern, I was involved in developing desktop and web applications, including applications to support warehouse processes related to inventory management and logistics. I also contributed to the development of a Finished Goods Tracking application to monitor products from production to delivery.

### **Certificate & Activities**

#### **SAP Migration Project**

**PT. YAGEO TMSS Indonesia**

*August 2025*

Completed technical training in SAP Migration, focusing on system and data migration processes, integration readiness, and validation to ensure data integrity and minimal downtime during SAP environment transitions.

#### **Performing Extra-Duties beyond those normally assigned**

**PT. YAGEO TMSS Indonesia**

*January - February 2025*

Performed additional duties beyond assigned responsibilities by handling operational and system-related issues in the warehouse, including troubleshooting process disruptions, supporting system usage, and ensuring continuity of warehouse operations.

#### **CCNA Routing and Switching: Introduction to Networks**

Cisco Networking Academy

*September 2023*

Completed CCNA Routing and Switching: Introduction to Networks training, with a basic understanding of how computer networks work. Able to explain networking concepts, how devices connect and communicate, and basic router and network configuration for small to medium-sized businesses. Proficient in IP address configuration, device connections, and basic network monitoring.

#### **NDG Linux Essentials Course**

Linux Professional Institute

*Juni 2018*

Understanding of the Linux operating system, the ability to use and navigate a Linux environment through the command line, and basic understanding of security and file access settings. Highly motivated to continue developing a career in IT.
